

## Java

```
class Solution {  
    public String lastNonEmptyString(String s) {  
  
    }  
}
```

---

## JavaScript

```
/**  
 * @param {string} s  
 * @return {string}  
 */  
var lastNonEmptyString = function(s) {  
  
};
```

---

## C++

```
class Solution {  
public:  
    string lastNonEmptyString(string s) {  
  
    }  
};
```

---

## C#

```
public class Solution {  
    public string LastNonEmptyString(string s) {  
    }  
}
```

---
